3M

This flexible, easy-to-cut
and easy-to-use 3M product
replaces lead wheel weights

The 3M™ Wheel Weight System is designed to have a lower impact on the environment than the industry-standard lead wheel weights. The 3M system consists of a unique, flexible and conformable material available in an easy-to-use, self-dispensing package, including a dispensing stand and cutting device.

Low Cost of Ownership

The 3M™ Wheel Weight System is provided as a roll good designed to be cut to length to meet your precision wheel balancing requirements. This easily cut-to-length product enables our customers to reduce their cost of ownership by eliminating traditional wheel weight inventories of individual part sizes.

Industry Leading Attachment

This 3M wheel weight system also features industry-leading 3M™ Acrylic Foam Tape adhesive used in numerous tape-applied attachments of component parts to vehicles. 3M's tape expertise, combined with the conformable wheel balancing material, provides an all-in-one, securely attached, 3M wheel weight balancing system.
